

BURRI cityGREEN BANYAN

Mobile urban green space

The cityGREEN BANYAN mobile urban green space is a simple, functional and easily manoeuvrable plant trough for use in the public space.

As with all other members of the BURRI cityGREEN family of products, BANYAN serves both the sensory revitalisation as well as the functional greening of public spaces. In addition to the functions of air purifier, source of oxygen and haven for biodiversity, these green areas provide summer shade for dwellers and help regulate the microclimate in squares and streets.

It can be moved with little effort and will find immediate application (no heavy construction required) also where the public space features specific constraints. Uses include uncomplicated or temporary configurations of areas, or experimental layouts for green spaces. Even utilisation as a simple and effective measure for traffic calming is straightforward with a mobile urban green space, including streets as play areas or in 30 km/h zones.

The side panels are made of high-quality Swiss wood, which can also be ordered in a range of colour lacquers, if desired. BANYAN is based on the design of the seating furniture of the Line Landscape, with which it can be easily and effectively combined. As an option, the plant trough can be lined with BURRI's patented ROOTPAKK®HMR® coating to prevent water leakage and corrosion, and to provide the product with even longer service life. These mobile urban green spaces from BURRI are complemented by short delivery times, advice on the choice of plants and attractive prices.

Plant trough construction:

- 8 mm steel plate
- hot-dip galvanised or raw oiled
- lacquered (optional colour of your choice)
- ROOTPAKK®HMR® coating (optional)

Side panel construction:

- Prime quality natural larch
- Ash from Switzerland, with four coatings of your colour of choice

Dimensions:

- Plant trough height: 960 mm
- Trough diameter (round): 1324 mm
- Trough length (square trough): 1090 x 1090mm
- Weight: approx. 1,2t (including contents)

Installation:

- freestanding
- Easy relocation via forklift

Recommended planting (MINI GREEN):

- E.g. native pine
- Evergreen, medium-sized crown (approx. 6x3 m)
- Branches start at approx. 2 - 2.5 m
