

The public space should be used and enjoyed by everyone.
The Landi Inclusion line makes this possible.

Swiss Wood

Made in Switzerland

20 years replacement parts guarantee

CO₂ reduced

The bench takes better account of the ergonomic needs of users, and is designed for easy rising as well as sitting upright. The armrests are rounded to provide comfortable support without pain. The seating surface and backrest are directly adjoining in order to provide greater stability for the torso musculature. There are no gaps for personal belongings to fall between – a design feature that is appreciated by elderly and mobility-impaired people alike.

The combination can be identified by touch from all sides using a cane. The contours of the bench and table are particularly clear thanks to optimised contrast ratios.
