

LK Seamless, large-scale light boxes

Slim design, frameless large-scale light boxes, single- or double-sided.

For the new check-in area at the Zurich International Airport, BURRI has developed a new, advanced display case.

The simple, frameless design and very thin built of only 170 mm (lit, double-sided) allows for many different applications in every architectural context. During development, special emphasis was placed on a poster installation-method without a visible frame.

The seamless LED-lit display case system can be wall mounted in sizes up to 6 x 2.8m and is also available as a free hanging, double-sided variant in sizes up to 6 x 2m. High torsion stiffness, comparatively low weight, high energy-efficiency and even light-distribution distinguish this new system.

Models:

- Wall mounted up to 6 x 2.8m
- freely suspended on both sides up to 6 x 2m
- Construction depth double-sided 170mm
