

Marco

A modern combination of materials in a classic shape

“Marco” benches are a classic combination of exposed concrete and wood.

Available as freestanding models with side bases for in-ground installation or on finished surfaces with mortar and as wall models with wall brackets.

Construction

- Exposed concrete base, bush-hammered
- Seat timbers either pine painted dark-green (RAL 6005) or untreated larch

Other lengths, types of wood or colours available on request.

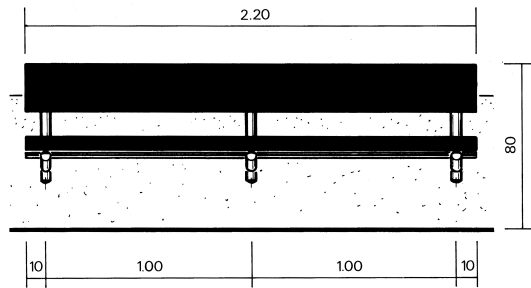

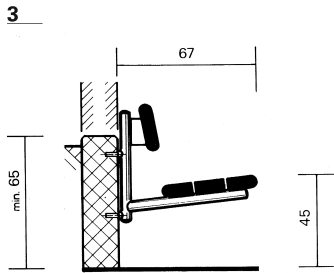

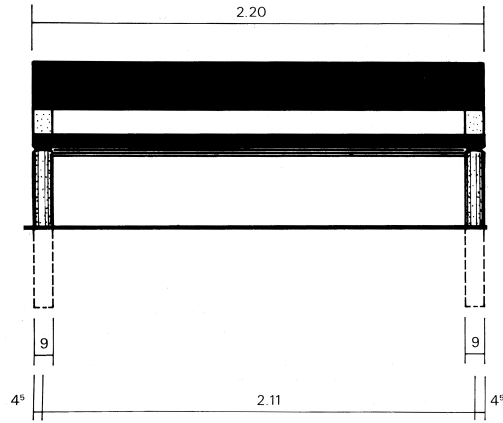

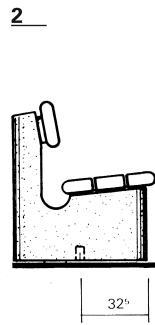

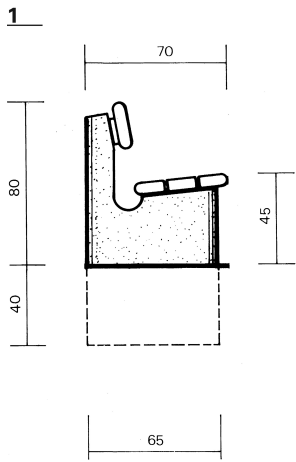

Installation

- On finished surface, can be secured in place with mortar, anchor or adhesive
- In-ground with side bases
- Hot-dip galvanised steel brackets for anchoring a bench to a wall

Models

- Marco with backrest
- In-ground
- On a finished surface
- Wall installation
