

## Planting bowl G19

Planting bowl on hot-dip galvanised steel frame

This robust and durable planting bowl is mounted on a hot-dip galvanised steel frame that can also be finished in RAL colours. The planting bowl is available in three heights. This means that it is also suitable for people with disabilities, as it is possible for wheelchairs to manoeuvre under the main body of the bowl. Moreover, the bowl can be used both outdoors and indoors.

The height-adjustable feet also allow for levelling on slopes.

The planting bowl is for use in outside areas as well for use in rooms.

- Version:
- Eternit® bowl
- Hot-dip galvanised steel frame

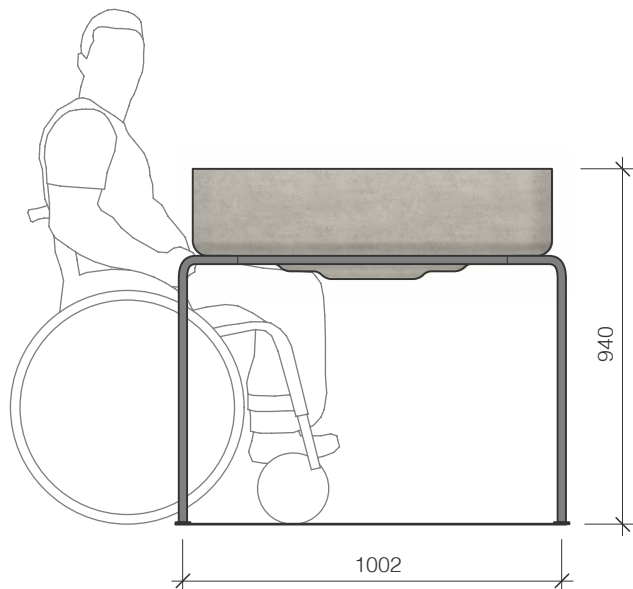

Other finishes for the frame possible on request
