## MIGROS logistics centre

---

### Outdoor lighting infrastructure with new METRO LED luminaires

---

The logistics centre in Gossau is the leading hub for Migros Eastern Switzerland, with deliveries of fresh products to around 100 supermarkets and 40 restaurants every day. An absolute prerequisite for such a logistical feat is smooth-running operation. Following growing demand, the logistics centre is modernising existing outdoor lighting infrastructure with new METRO LED pole-top luminaires. These ensure the necessary reliability for ongoing operation, and thanks to precise site illumination and high contrast colour rendition, also increase safety for drivers and staff. In addition, the high energy efficiency of the METRO LED luminaires combined with two-phase night lowering enable long-term savings.
